

# Cost-Effective Free-Standing Foam Board Backdrop (Disposable)

This cost-effective foam board backdrop is constructed using foam board with two support stands at the back. A single 8 x 8 ft matte print is affixed onto two foam panels, giving it the illusion of a sturdy wooden structure while keeping costs low.

### Highlights

- Lightweight & Disposable – Can be easily broken down into smaller sections for disposal by you or venue staff.
- Budget-Friendly – The most economical option, eliminating extra dismantling charges.
- Customizable – Available in various shapes and sizes upon request.

# Wooden Backdrop

Wooden backdrops are perfect for stages, events, or road shows that need a professional look for one-time use. Custom sizes are available, with options to include TV or projector screen mounting. No job is too big or small— we handle all projects. Choose from vinyl stickers or budget-friendly PVC canvas prints for your backdrop.

# Pop Up Fabric System

The 14 kg Pop Up Display System is faster and lighter than traditional magnetic displays, offering a simple, quick setup. Just open the frame, install the printed graphics on non-reflective fabric, and you're ready to showcase your message. It's the perfect solution for trade shows, roadshows, exhibitions, and retail spaces, providing an easy way to promote your products or services.

- **Faster & Lighter:** Weighs only 14 kg, lighter than traditional magnetic displays.
- **Quick & Simple Setup:** Open the frame, install non-reflective fabric graphics, and you're ready to go.
- **Compact & Portable:** Takes up only 32 cm of space, saving time, energy, and money.
- **No Heavy Magnets or Panels:** Uses Velcro fabric instead, making it lighter (around 2.1 kg).
- **Wind-Resistant:** Fabric reduces wind resistance, making it ideal for outdoor use.
- **Easy Assembly:** No complicated panel fittings; creases can be easily adjusted.
- **Cost-Effective:** No need for heavy, reflective displays or expensive hard cases.
- **Available sizes :** 3x3, 4x3, 6x3, 8x3

6 x 3

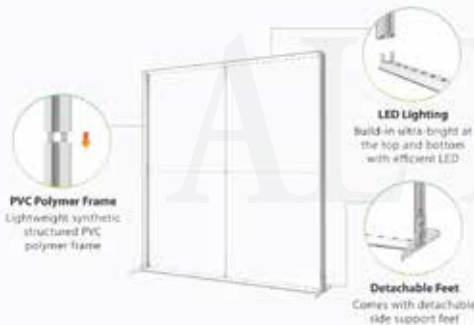

8 x 3

# LUCID Mobile Light Box (With Double-sided Print)

## Important Notes:

- The material is slightly stretchy.
- Measurements provided reflect the visible size.
- Store prints in a rolled format when not in use.
- Wrinkles and creases may occur in the print due to packaging.
- Tightening the prints during setup will result in a wrinkle-free finish.
- Avoid folding the fabric, as it will damage the print.
- Darker colors may flake, causing white spots.
- White spots will be covered with a permanent marker.

### No Loose Wires

Built in electrical wiring so there are no internal loose wires to connect.

### Adjustable Height

One frame can be built to 2.25 meter or 2 meter height, just add or remove the center upright piece.

### Edge to Edge Display

Silicon Edge Graphics create a perfect edge to edge Light Box Backdrop panel.

### Double Sided Showcase

# 3D-Straight Wall-10FT

Attaching such an KZ-T Frame -Tension Fabric Display to your tension fabric wall can create a dynamic, three-dimensional look and will attract more focus to your brand in a trade show, exhibition, conference, and other marketing events. It is a simple and portable solution for a backdrop. You can add left, right, or both panels to your 10FT Straight Tension Fabric Displays.

## SPECIFICATIONS

Display Size	Material	Layer	Printing
244x127cm/96"x50.1"	250g Polyester	Single / Double	Dye Sublimation

## DETAILS

Our KZ-T Frame -Tension Fabric Displays are built with durable and lightweight aluminum tubing with snap-on connectors. And the frame will be broken down to a compact size and labeled for quick and easy assembly. The tension fabric graphics are sewn with a zipper on the bottom, which can not only help secure the graphic on the frame but can also make the graphic snugly fit with no wrinkle. When the frame is ready, you can slip the graphic over the frame like a pillowcase for quick setup.

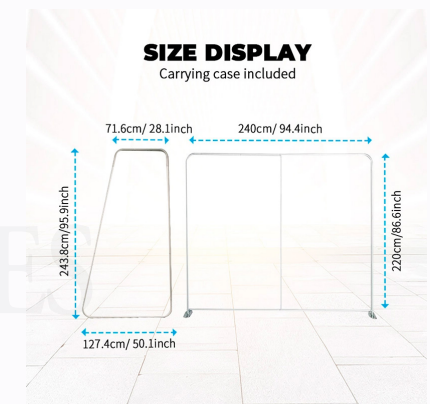

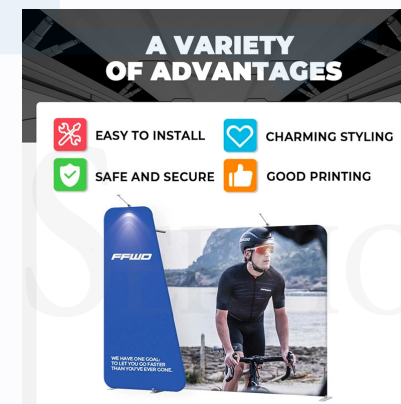

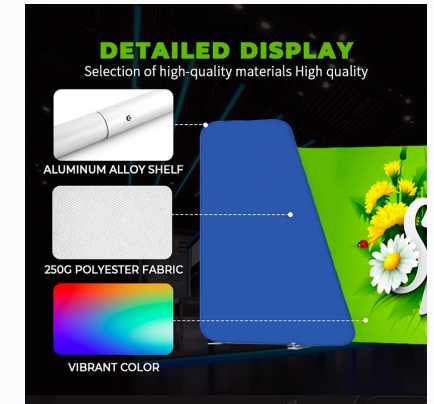

## FEATURES

**Easy installation** -With snap-on connectors, the panels are easy to set up and take down.

**Wrinkle-free** - Premium elastic fabrics are used to make the graphic. The zipper on the bottom will tighten the stretch fabric to perfectly display your image with no wrinkle.

**Custom design** - You can customize the design of the graphics to fit your tension fabric wall. Or you can also purchase them with our Straight Tension Fabric Displays.

**Long-lasting** - Both the premium fabrics and strong aluminium frame ensure that the panel can be repeatedly used for a long time.
